Kit Contents:

- Horn Switch
- Instruction Sheet

Warning: Warnings provide information which may reduce the risk of personal injury and prevent possible damage to others, your vehicle, and its equipment.

Warning: Always wear safety glasses when repairing an airbag supplemental restraint system (SRS) vehicle and when handling an air bag module. This will reduce the risk of injury in the event of an accidental deployment.

Warning: Carry a live air bag module with the air bag and trim cover pointed away from your body. This will reduce the risk of injury in the event of an accidental deployment.

Warning: Never probe the connectors on the air bag module. Doing so can result in air bag deployment, which can result in personal injury.

This symbol means use only the part indicated – Do Not Substitute.

Note 1: No omission or substitution, install as shown – sequence of assembly.

Note 2: Torque Control – all torque requirements must be maintained at installation with fasteners securely seated.

Service Procedure:
1. Remove the driver air bag. Refer to the appropriate car/truck workshop manual.

Removing the Horn Switch:
1. Place driver air bag on a clean protected surface.
2. Remove the horn switch connector as shown in Figure 2.
3. Loosen the two (2) screws, but do not remove them, until the driver air bag cover can be flipped up as shown in Figure 3.

NOTE: Be careful not to damage the tabs on the sides of the air bag when flipping up the cover.

4. Flip the driver air bag cover into the open position and disengage the tabs on both sides of the air bag.
5. Remove the old horn switch (refer to Figure 3).
6. Mark the old part (horn switch) with an X.

Replacing the Horn Switch:
1. Install the service replacement part into the two (2) sensor tab slots indicated in Figure 3.
2. Return the airbag cover to its original position.
3. Ensure that BOTH tabs (A) on the sides of the air bag cover are seated into the slots (B) as indicated in Figure 3.

Warning: Failure to do so may increase the risk of injury in an air bag deployment.

4. Reinstall the two (2) screws through the horn switch holes as indicated in Figure 2, tighten to 12 N-m.
5. Reconnect the horn switch connector.

NOTE: Make sure the connector is properly seated.

6. Install the driver air bag. Refer to the appropriate car/truck workshop manual.
Two (2) screws
